# COMBAT ARMOR VEST- EXTRACTION

PRODUCT CODE: CAV-E

S.O. Tech's new Armor Extraction Vest is a perfect fit for Aviators and Aircrew alike as well as the Individual Ground Troop or Reconnaissance Team who may find themselves in need of immediate extraction where time on the ground and terrain can become a life changing obstacle to overcome. The vest properties consist of 1000 Denier Nylon Cordura FRX and Flame Resistant Mesh specifically to meet Federal Burn Requirements for Airworthiness. It is constructed using heavy duty 138FF Nylon Thread and Type 7 Parachute Webbing sewn continually throughout the exterior of the vest with 4 point stitching on all stress points and underneath the Armor Carriage making it virtually impossible to exceed weight and load carriage standards. Adjustable Leg Straps are attached with heavy-duty steel COBRA™ Buckles for speedy preparation. Reinforced steel adjusting buckles provide easy adjustment at the shoulders and waist with no snag hazards and side saddle integration makes for an extremely safe and comfortable fit. Extraction loops are sewn low enough in the front of the vest to ensure no contact with the neck or face during extraction (when at full arch) and will fit most standard climbing and rappelling carabiners.

141 5/09

No contact with neck or face during extraction.
