GO BAG EXTENDED

PRODUCT CODE: SGB-X

INSERT PRODUCT CODE: SGBI

DESIGNED FOR HELIBORNE AND HUMVEE MOUNTED PERSONNEL.

The only thing worse than getting shot out of the sky or hit by an IED is knowing that you now you have to get your kit and get out of the area. Our Go-Bag was designed for Helicopter crews and Humvee personnel, so that in the even of a crisis, they could grab the bag on the way out of the vehicle. It fits perfectly in the spaces that exist in a Helicopter or Humvee, which are too small for a ruck, but could be a great storage site for an E&E bag. The options for this bag are endless. The Medics fit a roll up stretcher in it, the Spec Ops shooters use it for E&E kits, and when you're not shooting and moving, it's a great Bail-Out-Bag for your car, home or gym.

CONCEALED CARRY DEVICE BAG.

The tubular design gives a civilian look and masks large devices. Extended Version is 3" longer and can be used as a concealed device bag. This extended version of the Go-Bag was designed as a covert carry option for the shooters who need a device close by, while still being low profile. This is the perfect system for 17.5" devices and the upper and lower components of a similar device. This is perfect for contractor work where the principal understands the need for such devices, but the situation dictates a low profile signature. The outside has two pouches where you can store an assortment of mission related items. The inside has a Cordura® covered foam divider (sold separately, SGBI) for a broken down device, or any other kit your mission dictates.

S.O.TECH TECHNICAL SUPPORT.

S.O.TECH provides technical assistance. Just call 800/615-9007 and one of our friendly customer support personnel will assist you.
